# **Nanodisc Human CXCR1-Strep Protein**

#### HDFP828

## **Product Information**

Product SKU: HDFP828 Expression Host: HEK293 Size: 10μg

**Target**: CXCR1 **Tag**: C-Flag&Strep Tag

#### **Additional Information**

Conjugate: Unconjugated Uniprot ID: P25024

**Molecular Weight:** The human full length CXCR1-Strep protein has a MW of 39.8 kDa

## **Protein Information**

**Background**: The protein is a member of the G-protein-coupled receptor family. This protein is a

receptor for interleukin 8 (IL8). It binds to IL8 with high affinity, and transduces the

signal through a G-protein activated second messenger system. Knockout studies in

mice suggested that this protein inhibits embryonic oligodendrocyte precursor

migration in developing spinal cord. This gene, IL8RB, a gene encoding another high

affinity IL8 receptor, as well as IL8RBP, a pseudogene of IL8RB, form a gene cluster in

a region mapped to chromosome 2q33-q36.

**Synonyms**: C-C; C-C-CKR-1; CD128; CD181; CDw128a; CKR-1; CMKAR1; IL8R1; IL8RA; IL8RBA

**Protein Description**: Human CXCR1-Strep full length protein-synthetic nanodisc

Formulation: Lyophilized from nanodisc solubilization buffer (20 mM Tris-HCl, 150 mM NaCl, pH

8.0). Normally 5% – 8% trehalose is added as protectants before lyophilization. Please

see Certificate of Analysis for specific instructions. Do not use solvents with a pH

below 6.5 or those containing high concentrations of divalent metal ions (greater

than 5 mM) in subsequent experiments.

**Protein Pathways**: Chemokine signaling pathway, Cytokine-cytokine receptor interaction, Endocytosis,

Epithelial cell signaling in Helicobacter pylori infection.

**Protein Families:** Druggable Genome, GPCR, Transmembrane.

**Usage**: Research use only

Storage & Shipping:

Store at -20°C to -80°C for 12 months in lyophilized form. After reconstitution, if not intended for use within a month, aliquot and store at -80°C (Avoid repeated freezing and thawing). Lyophilized proteins are shipped at ambient temperature.
