Nanodisc Human ADGRE5-Strep Protein

HDFP853

Product Information

Product SKU :	HDFP853	Expression Host:	HEK293		Size:	10µg		
Target:	ADGRE5	Тад:	C-Flag&St	rep Tag				
Additional Information								
Conjugate :	Unconjuga	ated Unip	orot ID:	P48960				
Molecular Wei	ght: The huma	The human full length ADGRE5-Strep protein has a MW of 90.5 kDa						

Protein Information

Background: A member of the EGF-TM7 subfamily of adhesion G protein-coupled receptors, which mediate cell-cell interactions. These proteins are cleaved by self-catalytic proteolysis into a large extracellular subunit and seven-span transmembrane subunit, which associate at the cell surface as a receptor complex. The encoded protein may play a role in cell adhesion as well as leukocyte recruitment, activation and migration, and contains multiple extracellular EGF-like repeats which mediate binding to chondroitin sulfate and the cell surface complement regulatory protein CD55. Expression of this gene may play a role in the progression of several types of cancer. Alternatively spliced transcript variants encoding multiple isoforms with 3 to 5 EGF-like repeats have been observed for this gene. This gene is found in a cluster with other EGF-TM7 genes on the short arm of chromosome 19.

Synonyms: CD97; TM7LN1

Protein Description: Human ADGRE5-Strep full length protein-synthetic nanodisc

Formulation: Lyophilized from nanodisc solubilization buffer (20 mM Tris-HCl, 150 mM NaCl, pH 8.0). Normally 5% – 8% trehalose is added as protectants before lyophilization. Please see Certificate of Analysis for specific instructions. Do not use solvents with a pH below 6.5 or those containing high concentrations of divalent metal ions (greater than 5 mM) in subsequent experiments.

Protein Pathways:

Protein Families:	Druggable Genome, GPCR, Transmembrane.		
Usage:	Research use only		
Storage & Shipping:	Store at -20°C to -80°C for 12 months in lyophilized form. After reconstitution, if not		
	intended for use within a month, aliquot and store at -80°C (Avoid repeated freezing		
	and thawing). Lyophilized proteins are shipped at ambient temperature.
