Nanodisc Human CMKLR1-Strep Protein

HDFP862

Product Information

Product SKU: HDFP862 Expression Host: HEK293 Size: 10μg

Target: CMKLR1 Tag: C-Flag&Strep Tag

Additional Information

Conjugate: Unconjugated **Uniprot ID**: Q99788

Molecular Weight: The human full length CMKLR1-Strep protein has a MW of 42.3 kDa

Protein Information

Background: Receptor for the chemoattractant adipokine chemerin/RARRES2 and for the omega-

3 fatty acid derived molecule resolvin E1. Interaction with RARRES2 induces activation

of intracellular signaling molecules, such as SKY, MAPK1/3 (ERK1/2),

MAPK14/P38MAPK and PI3K leading to multifunctional effects, like, reduction of

immune responses, enhancing of adipogenesis and angionesis. Resolvin E1 down-

regulates cytokine production in macrophages by reducing the activation of

MAPK1/3 (ERK1/2) and NF-kappa-B. Positively regulates adipogenesis and adipocyte

metabolism. Acts as a coreceptor for several SIV strains (SIVMAC316, SIVMAC239,

SIVMACL7E-FR and SIVSM62A), as well as a primary HIV-1 strain (92UG024-2).

Synonyms: CHEMERINR; ChemR23; DEZ; RVER1

Protein Description: Human CMKLR1-Strep full length protein-synthetic nanodisc

Formulation: Lyophilized from nanodisc solubilization buffer (20 mM Tris-HCl, 150 mM NaCl, pH

8.0). Normally 5% - 8% trehalose is added as protectants before lyophilization. Please

see Certificate of Analysis for specific instructions. Do not use solvents with a pH

below 6.5 or those containing high concentrations of divalent metal ions (greater

than 5 mM) in subsequent experiments.

Protein Pathways: -

Protein Families: Druggable Genome, GPCR, Transmembrane.

Usage: Research use only

Storage & Shipping:

Store at -20°C to -80°C for 12 months in lyophilized form. After reconstitution, if not intended for use within a month, aliquot and store at -80°C (Avoid repeated freezing and thawing). Lyophilized proteins are shipped at ambient temperature.
