# **Nanodisc Human TLR2-Strep Protein**

#### HDFP876

### **Product Information**

Product SKU: HDFP876 Expression Host: HEK293 Size: 10μg

Target: TLR2 Tag: C-Flag&Strep Tag

## **Additional Information**

**Conjugate**: Unconjugated **Uniprot ID**: O60603

Molecular Weight: The human full length TLR2-Strep protein has a MW of 89.8 kDa

#### **Protein Information**

**Background**: The protein is a member of the Toll-like receptor (TLR) family which plays a

fundamental role in pathogen recognition and activation of innate immunity. TLRs

are highly conserved from Drosophila to humans and share structural and functional

similarities. This protein is a cell-surface protein that can form heterodimers with

other TLR family members to recognize conserved molecules derived from

microorganisms known as pathogen-associated molecular patterns (PAMPs).

Activation of TLRs by PAMPs leads to an up-regulation of signaling pathways to

modulate the host's inflammatory response. This gene is also thought to promote

apoptosis in response to bacterial lipoproteins. This gene has been implicated in the

pathogenesis of several autoimmune diseases. Alternative splicing results in multiple

transcript variants.

**Synonyms**: CD282; TIL4

**Protein Description**: Human TLR2-Strep full length protein-synthetic nanodisc

Formulation: Lyophilized from nanodisc solubilization buffer (20 mM Tris-HCl, 150 mM NaCl, pH

8.0). Normally 5% – 8% trehalose is added as protectants before lyophilization. Please

see Certificate of Analysis for specific instructions. Do not use solvents with a pH

below 6.5 or those containing high concentrations of divalent metal ions (greater

than 5 mM) in subsequent experiments.

**Protein Pathways**: Toll-like receptor signaling pathway.

**Protein Families:** Druggable Genome, Transmembrane.

**Usage**: Research use only

**Storage & Shipping**: Store at -20°C to -80°C for 12 months in lyophilized form. After reconstitution, if not

intended for use within a month, aliquot and store at -80°C (Avoid repeated freezing

and thawing). Lyophilized proteins are shipped at ambient temperature.
