Nanodisc Human 5HT1D-Strep Protein

HDFP892

Product Information

| Product SKU: | HDFP892 | Expression Host: | HEK293 | | Size: | 10µg | |
|------------------------|----------------|--|-----------|----------|-------|------|--|
| Target: | 5HT1D | Tag: | C-Flag&St | trep Tag | | | |
| | | | | | | | |
| Additional Information | | | | | | | |
| Conjugate : | Unconjuga | ted Unip | orot ID: | P28221 | | | |
| Molecular Wei | ght: The humar | The human full length 5HT1D-Strep protein has a MW of 41.9 kDa | | | | | |
| | | | | | | | |

Protein Information

| Background: | G-protein coupled receptor for 5-hydroxytryptamine (serotonin). Also functions as a | | | | | |
|--------------------------|--|--|--|--|--|--|
| | receptor for ergot alkaloid derivatives, various anxiolytic and antidepressant drugs | | | | | |
| | and other psychoactive substances. Ligand binding causes a conformation change | | | | | |
| | that triggers signaling via guanine nucleotide-binding proteins (G proteins) and | | | | | |
| | modulates the activity of down-stream effectors, such as adenylate cyclase. Signaling | | | | | |
| | inhibits adenylate cyclase activity. Regulates the release of 5-hydroxytryptamine in | | | | | |
| | the brain, and thereby affects neural activity. May also play a role in regulating the | | | | | |
| | release of other neurotransmitters. May play a role in | | | | | |
| | vasoconstriction.[UniProtKB/Swiss-Prot Function] | | | | | |
| Synonyms: | 5-HT1D, HT1DA, HTR1DA, HTRL, RDC4 | | | | | |
| Protein Description: | Human 5HT1D-Strep full length protein-synthetic nanodisc | | | | | |
| Formulation: | Lyophilized from nanodisc solubilization buffer (20 mM Tris-HCl, 150 mM NaCl, pH | | | | | |
| | 8.0). Normally 5% – 8% trehalose is added as protectants before lyophilization. Please | | | | | |
| | see Certificate of Analysis for specific instructions. Do not use solvents with a pH | | | | | |
| | below 6.5 or those containing high concentrations of divalent metal ions (greater | | | | | |
| | than 5 mM) in subsequent experiments. | | | | | |
| Protein Pathways: | GPCRDB Class A Rhodopsin-like, Monoamine GPCRs. | | | | | |
| Protein Families: | GPCR, Transmembrane, Druggable Genome. | | | | | |
| Usage: | Research use only | | | | | |

Storage & Shipping: Store at -20°C to -80°C for 12 months in lyophilized form. After reconstitution, if not intended for use within a month, aliquot and store at -80°C (Avoid repeated freezing and thawing). Lyophilized proteins are shipped at ambient temperature.
