Nanodisc Human AGRL2-Strep Protein

HDFP937

Product Information

Product SKU :	HDF	P937	Expression Host:	HEK293		Size:	10µg
Target:	AGR	L2	Tag:	C-Flag&Strep Tag			
Additional Information							
Conjugate :	Conjugate :		d Unip	orot ID:	O95490		
Molecular Weight:		The human full length AGRL2-Strep protein has a MW of 163.3 kDa					
Protein Informa	tion						
Background [.]		This gene	encodes a memb	er of the la	trophilin s	ubfamily of (5-protein coupled

Background: This gene encodes a member of the latrophilin subfamily of G-protein coupled receptors. The encoded protein participates in the regulation of exocytosis. The proprotein is thought to be further cleaved within a cysteine-rich G-protein-coupled receptor proteolysis site into two chains that are non-covalently bound at the cell membrane. Alternative splicing results in multiple transcript variants. [provided by RefSeq, Jul 2014]

Synonyms: CIRL2, CL2, LEC1, LPHH1, LPHN2

Protein Description: Human AGRL2-Strep full length protein-synthetic nanodisc

Formulation: Lyophilized from nanodisc solubilization buffer (20 mM Tris-HCl, 150 mM NaCl, pH 8.0). Normally 5% – 8% trehalose is added as protectants before lyophilization. Please see Certificate of Analysis for specific instructions. Do not use solvents with a pH below 6.5 or those containing high concentrations of divalent metal ions (greater than 5 mM) in subsequent experiments.
Protein Pathways: GPCRDB Class B Secretin-like, GPCRDB Other.

Protein Families: GPCR, Transmembrane, Druggable Genome.

Usage: Research use only

Storage & Shipping: Store at -20°C to -80°C for 12 months in lyophilized form. After reconstitution, if not intended for use within a month, aliquot and store at -80°C (Avoid repeated freezing and thawing). Lyophilized proteins are shipped at ambient temperature.
