Recombinant Human Aminopeptidase N/APN/CD13 Protein

RPCB0278

Product Information

Product SKU: RPCB0278 Gene ID: 290 Size: 10μg

Tag: C-His Reactivity: Human

Additional Information

Expression Host: HEK293 cells **Swissprot**: P15144

Purity: > 98% by SDS-PAGE.

Protein Information

Background: Aminopeptidase N is located in the small-intestinal and renal microvillar membrane,

and also in other plasma membranes. In the small intestine aminopeptidase N plays

a role in the final digestion of peptides generated from hydrolysis of proteins by

gastric and pancreatic proteases. Its function in proximal tubular epithelial cells and

other cell types is less clear. The large extracellular carboxyterminal domain contains

a pentapeptide consensus sequence characteristic of members of the zinc-binding

metalloproteinase superfamily. Sequence comparisons with known enzymes of this class showed that CD13 and aminopeptidase N are identical. The latter enzyme was

thought to be involved in the metabolism of regulatory peptides by diverse cell types,

including small intestinal and renal tubular epithelial cells, macrophages,

granulocytes, and synaptic membranes from the CNS. Human aminopeptidase N is a

receptor for one strain of human coronavirus that is an important cause of upper

respiratory tract infections. Defects in this gene appear to be a cause of various types

of leukemia or lymphoma.

Protein Description: High quality, high purity and low endotoxin recombinant Recombinant Human

Aminopeptidase N/APN/CD13 Protein, tested reactivity in HEK293 cells and has been

validated in SDS-PAGE.100% guaranteed.

Endotoxin: < 0.1 EU/μg of the protein by LAL method.

Formulation: Lyophilized from a 0.22 μm filtered solution of PBS, pH 7.4.Contact us for customized

product form or formulation.

Storage: Store at -20°C.Store the lyophilized protein at -20°C to -80 °C up to 1 year from the

date of receipt.After reconstitution, the protein solution is stable at -20°C for 3

months, at 2-8°C for up to 1 week.
