Recombinant Human HER1/ERBB1/EGFR Protein

RPCB0313

Product Information

Product SKU: Tag:	RPCB0313 C-His	Gene ID: Reactivity:	1956 Human		Size:	10µg
Additional Infor Expression Hos Purity:			Swissprot:	P00533		

Protein Information

Background:	The EGFR (epidermal growth factor receptor) subfamily of receptor tyrosine kinase		
	comprises four members: EGFR (also known as HER-1, ErbB1, or ErbB), ErbB2 (Ne		
	HER-2), ErbB3 (HER-3), and ErbB4 (HER-4). EGFR protein is type I transmembrane		
	glycoprotein that binds a subset of EGF family ligands including EGF, amphiregulin,		
	TGF- α , betacellulin, etc.The human EGFR cDNA encodes a 1210 amino acid (aa)		
	precursor with a 24 aa signal peptide, a 621 aa extracellular domain (ECD), a 23 aa		
	transmembrane segment, and a 542 aa cytoplasmic domain. EGFR signaling has been		
	shown to exert action on carcinogenesis and disease progression, and thus EGFR		
	protein is proposed as a target for cancer therapy currently, which is overexpressed		
	in a wide variety of tumors and is the target of several anti-cancer drugs.		
Protein Description:	High quality, high purity and low endotoxin recombinant Recombinant Human		
	HER1/ERBB1/EGFR Protein, tested reactivity in HEK293 cells and has been validated		
	in SDS-PAGE.100% guaranteed.		
Endotoxin:	< 0.1 EU/ μ g of the protein by LAL method.		
Formulation :	Lyophilized from a 0.22 μm filtered solution of PBS, pH 7.4.Contact us for customized		
	product form or formulation.		
Storage:	Store at -20°C.Store the lyophilized protein at -20°C to -80 °C up to 1 year from the		
	date of receipt.After reconstitution, the protein solution is stable at -20°C for 3		
	months, at 2-8°C for up to 1 week.
