

Recombinant Human Retinol-binding protein 4/PRBP Protein

RPCB0455

Product Information

Product SKU: RPCB0455 **Gene ID:** 5950 **Size:** 10µg
Tag: C-hFc&His **Reactivity:** Human

Additional Information

Expression Host: HEK293 cells **Swissprot:** P02753
Purity: > 97% by SDS-PAGE.

Protein Information

Background: This protein belongs to the lipocalin family and is the specific carrier for retinol (vitamin A alcohol) in the blood. It delivers retinol from the liver stores to the peripheral tissues. In plasma, the RBP-retinol complex interacts with transthyretin which prevents its loss by filtration through the kidney glomeruli. A deficiency of vitamin A blocks secretion of the binding protein posttranslationally and results in defective delivery and supply to the epidermal cells.

Protein Description: High quality, high purity and low endotoxin recombinant Recombinant Human Retinol-binding protein 4/PRBP Protein, tested reactivity in HEK293 cells and has been validated in SDS-PAGE. 100% guaranteed.

Endotoxin: < 0.1 EU/µg of the protein by LAL method.

Formulation: Lyophilized from a 0.22 µm filtered solution of PBS, pH 7.4. Contact us for customized product form or formulation.

Storage: Store at -20°C. Store the lyophilized protein at -20°C to -80 °C up to 1 year from the date of receipt. After reconstitution, the protein solution is stable at -20°C for 3 months, at 2-8°C for up to 1 week.
