

RPCB1059

Product Information

Product SKU:	RPCB1059	Gene ID:	2254	Size:	10µg
Tag:	NO-tag	Reactivity:	Human		

Additional Information

Expression Host:	E. coli	Swissprot:	P31371
Purity:	-		

Protein Information

Background: Fibroblast growth factor 9 (FGF9) also known as Glia-activating factor or Heparin-binding growth factor 9, is a member of the fibroblast growth factor (FGF) family. FGF family members possess broad mitogenic and cell survival activities, and are involved in a variety of biological processes, including embryonic development, cell growth, morphogenesis, tissue repair, tumor growth and invasion. This protein was isolated as a secreted factor that exhibits a growth-stimulating effect on cultured glial cells.

Protein Description: High quality, high purity and low endotoxin recombinant Recombinant Human FGF-9 Protein, tested reactivity in E. coli and has been validated in SDS-PAGE. 100% guaranteed.

Endotoxin: <1EU/µg

Formulation: Lyophilized from a 0.22 µm filtered solution of 20mM PB, pH 6.0.

Storage: Store at -20°C. Store the lyophilized protein at -20°C to -80 °C up to 1 year from the date of receipt. After reconstitution, the protein solution is stable at -20°C for 3 months, at 2-8°C for up to 1 week.
