Recombinant Mouse ICOS/CD278 Protein

RPCB1623

Product Information

Product SKU: RPCB1623 **Gene ID**: 54167 **Size**: 10μg

Tag: C-hFc **Reactivity**: Mouse

Additional Information

Expression Host: HEK293 cells **Swissprot**: Q9WVS0

Purity: > 95% by SDS-PAGE.

Protein Information

Background: Inducible costimulator (ICOS), also called AILIM (Activation-Inducible Lymphocyte

 $Immunomediatory\ Molecule)\ is\ a\ cell-surface\ receptor\ and\ belongs\ to\ the\ CD28$

family of immune costimulatory receptors consisting of CD28, CTLA-4, and PD-1. The

interaction of B7-H2/ICOS plays a critical role in Th cell differentiation, T/B cell

interactions which are essential for the germinal center formation, and humoral

immune responses, and as well as the production of cytokine IL-4. Also, ICOS is more

potent in the induction of IL-10 production, a cytokine important for the suppressive function of T regulatory cells. The B7-1/B7-2--CD28/CTLA-4 and ICOS-B7RP-1

pathway provide key second signals that can regulate the activation, inhibition, and

fine-tuning of T-lymphocyte responses. ICOS stimulates both Th1 and Th2 cytokine

production but may have a preferential role in Th2 cell development. Moreover, The

B7-1/B7-2-CD28/CTLA-4 and ICOS-B7RP-1 pathway has been suggested as being

involved in the development of airway inflammation and airway hyperresponsiveness.

Protein Description: High quality, high purity and low endotoxin recombinant Recombinant Mouse

ICOS/CD278 Protein, tested reactivity in HEK293 cells and has been validated in SDS-

PAGE.100% guaranteed.

Endotoxin: $< 0.1 EU/\mu g$

Formulation: Lyophilized from a 0.22 µm filtered solution of PBS, pH 7.4.

Storage:

Store at -20°C. Store the lyophilized protein at -20°C to -80 °C up to 1 year from the date of receipt. After reconstitution, the protein solution is stable at -20°C for 3 months, at 2-8°C for up to 1 week.
