

RPCB1806

Product Information

Product SKU: RPCB1806 **Gene ID:** 2346 **Size:** 10µg
Tag: N-hFc **Reactivity:** Human

Additional Information

Expression Host: HEK293 cells **Swissprot:** Q04609-1
Purity: -

Protein Information

Background: Prostate-specific membrane antigen (PSMA) is an enzyme that in humans is encoded by the FOLH1 (folate hydrolase 1) gene, also known as Glutamate carboxypeptidase II (GCPII). Human PSMA is highly expressed in the prostate, roughly a hundred times greater than in most other tissues. In some prostate cancers, PSMA is the second-most upregulated gene product, with an 8- to 12-fold increase over levels in noncancerous prostate cells.

Protein Description: High quality, high purity and low endotoxin recombinant Recombinant Human PSMA/FOLH1 Protein, tested reactivity in HEK293 cells and has been validated in SDS-PAGE. 100% guaranteed.

Endotoxin: <0.01EU/ug of the protein by LAL method.

Formulation: -

Storage: Store at -20°C. Store the lyophilized protein at -20°C to -80 °C up to 1 year from the date of receipt. After reconstitution, the protein solution is stable at -20°C for 3 months, at 2-8°C for up to 1 week.
