Recombinant Mouse TNFSF10 Protein (Trx Tag)

RPES8157

Product Information

Product SKU: Tag:	RPES8157 N-Trx	Expression Host: Reactivity:	E.coli Mouse		Size: Accession:	20µg Р50592	
Additional Information							
Calculated MW	: 39 kDa	Obse	erved MW:	39 kDa			
Sequence:	Pro118-Asn2	91					

Protein Information

Tumor necrosis factor ligand superfamily member 10 (TNFSF10), also known as TNF-Background: related apoptosis-inducing ligand (TRAIL), Apo-2 ligand, and CD253, is a cytokine that belongs to the tumor necrosis factor (TNF) ligand family. TNFSF10 / Apo-2L / CD253 functions as a ligand that induces the process of cell death called apoptosis. TNFSF10 / TRAIL shows homology to other members of the tumor necrosis factor superfamily. As one member of the cluster of differentiation system, TNFSF10 / CD253 is commonly used as cell markers in Immunophenotyping. Different kinds of cells in the immune system can be identified through the surface CD molecules which associating with the immune function of the cell. There are more than 320 CD unique clusters and subclusters have been identified. Some of the CD molecules serve as receptors or ligands important to the cell through initiating a signal cascade which then alter the behavior of the cell. Some CD proteins do not take part in cell signal process but have other functions such as cell adhesion TNFSF10 / Apo-2L / CD253 / TRAIL binds to several members of TNF receptor superfamily including TNFRSF10A / TRAILR1, TNFRSF10B / TRAILR2, TNFRSF10C / TRAILR3, TNFRSF10D / TRAILR4, and possibly also to TNFRSF11B/OPG. The activity of TNFSF10 / TRAIL may be modulated by binding to the decoy receptors TNFRSF10C / TRAILR3, TNFRSF10D/TRAILR4, and TNFRSF11B/OPG that cannot induce apoptosis. The binding of this protein to its receptors has been shown to trigger the activation of MAPK8 / JNK, caspase 8, and caspase 3. Alternatively spliced transcript variants encoding different isoforms have been found for this gene.

Synonyms:	-		
Endotoxin:	< 10 EU/mg of the protein as determined by the LAL method		
Formulation:	Lyophilized from a 0.2 μm filtered solution in PBS with 5% Trehalose and 5% Mannitol.		
Purity	> 90% as determined by reducing SDS-PAGE.		
Bio-Activity :	Not validated for activity		
Storage:	Generally, lyophilized proteins are stable for up to 12 months when stored at -20 to		
	-80°C. Reconstituted protein solution can be stored at 4-8°C for 2-7 days. Aliquots of		
	reconstituted samples are stable at $< -20^{\circ}$ C for 3 months.
